

GatorGuard

FLOATING ALLIGATOR HEAD REPLICA

**REPELS • GEESE • DUCKS • EGRETS
CORMORANTS • HERON
SMALL ANIMALS
& MORE!**

REALISTIC, UNASSUMING AND PERMANENT

Life-sized floating replica of an alligator head, 25 threatening inches long, scares geese, ducks, fish-eating birds and small animals from the water areas they love, without spoiling the look of your property.

THIS WORKS BECAUSE IT MOVES!

Stationary owls don't work. But GatorGuard moves and bounces all around the pond with the wind and water. Plus, the mirror-backed eyes flash in the sun. Birds think they're being followed, so they can't acclimate to a fixed pattern.

ENVIRONMENTALLY SAFE, UNIVERSAL SOLUTION

Perfect for any water area infested by birds — can be anchored

- golf courses or park districts
- condominium, school or industrial park lakes
- residential pools
- fish and shrimp farms
- koi ponds and more.

"Last year we had 30 geese leaving their calling cards... We floated a GatorGuard... After three weeks, we had no waterfowl on our property..."

— **BRUCE A.**, Lebanon Missouri

"My members thought it was a joke to start with... but it does work. We haven't had a goose on this property since we put them in."

— **ROB F.**, Shalby Oaks Golf Course, Sidney Ohio

SPECIFICATIONS

DIMENSIONS 25" long x 11" wide x 7" tall

WEIGHT 4 pounds

COVERAGE to 1 acre (0.4 hectares) depending on size, shape and surroundings of area
