

**Active Ingredient**

metsulfuron methyl

**% Active Ingredient**

60.0%

**Formulation**

dispersible granule

**Chemical Family**

sulfonyleurea

**EPA Registration #**

81959-14

**Brand Alternative**

Blade™/Manor®

**Mode of Action**

amino acid inhibitor

**Restricted Use**

no

**Signal Word**

caution

**Packaging Information**

2 wt oz bottle

16 bottles = 32 wt oz

MSM E-Pro Turf Herbicide contains metsulfuron-methyl, the active ingredient used in Blade™ and Manor®.

## Control Weeds Effectively and Economically

with MSM E-Pro Turf Herbicide.

**Controlling bahiagrass and other tough weeds** in warm-season turf without harming grass is no longer a costly, difficult challenge, thanks in part to Etigra MSM E-Pro Turf Herbicide.

The active ingredient in MSM E-Pro Turf, metsulfuron, is a highly-effective herbicide. Plus, it can hasten the spring release of overseeded bermudagrass without injuring bermudagrass.

**Like all of Etigra's products,** MSM

E-Pro Turf Herbicide is manufactured to the highest standards in both the technical and formulation stages. The result: you can count on MSM E-Pro Turf Herbicide to deliver exactly the mixing and application properties – and the weed control – you expect, at the value you need.

# Key Performance Benefits

## Broad-spectrum control

Delivers excellent control of ryegrass, bahiagrass and foxtails and broadleaf weeds such as spurge, wild onion, dandelion and more.

## Low use rate

Translates to low risk to you and non-target organisms.

## Fine granular formulation

Allows easier measuring.

## Cost-effective option

Provides an economical post-patent alternative to Blade™ and Manor® herbicides.

## Notes

Horizontal lines for notes

### Labeled Uses

- Ornamental turf
- Sod farms

### Weeds Controlled

- Annual sowthistle
- Aster
- Bittercress
- Blue mustard
- Buckhorn
- Bur buttercup
