

## Gen III Tankless System

### DESCRIPTION

MistAway's patent pending Gen III state of the art tankless misting system eliminates the concerns of large bulky reservoirs full of insecticide. The Gen III connects to a standard outdoor hose bib, eliminating time consuming refills. Simply snap in a cartridge of Summer Frost botanical insecticide and the automated controller does all the work. Each time the system is activated, Gen III precisely mixes a fresh batch from the concentrate. The information required to manage the insecticide is contained in the cartridge's programmable patented PRO-CAP.
